ClamTech

A Note

from Malcolm Lungaro-Mifsud, COO

Over the past year, Clamtech has continued to grow not only in scale, but also in depth, strengthening our technical capabilities, refining our processes, and investing in the people and partnerships that define who we are.

The months ahead will see us deepen our focus on cloud infrastructure, DevOps, and emerging technologies, while continuing to deliver robust, reliable solutions for our clients. Alongside this, we are excited to strengthen our collaboration with key partners and to create opportunities for knowledge sharing, learning, and connection within the wider tech community. In this issue, we share a snapshot of what lies ahead.

Thank you for being part of our journey.

Malcolm Lungaro-Mifsud

In this Issue

- Clamtech in 2026 – Our strategic focus
- Investing in our Team
- Strategic Partnership: IONOS

LOOKING AHEAD: CLAMTECH IN 2026

2026 is a year shaped by focus, collaboration,and thoughtful innovation.

OUR PRIORITIES ARE CENTRED AROUND FOUR CORE AREAS:

1. Cloud & Infrastructure Excellence

We continue to invest in robust, scalable, and secure cloud environments, supporting organisations as they modernise their infrastructure and optimise performance.

2. DevOps & Operational Efficiency

Our DevOps approach is grounded in real-world application: streamlining deployment pipelines, improving system reliability, and enabling teams to move faster without compromising on security or stability.

3. Partnerships that Add Real Value

We believe that the strongest solutions are built through collaboration. In 2026, we are strengthening our partnerships with global players, working together to deliver solutions that are practical, scalable, and aligned with evolving client needs.

4. Practical AI & Intelligent Infrastructure

Artificial Intelligence is increasingly becoming part of modern infrastructure. In 2026, Clamtech will focus on practical, real-world AI applications that enhance system performance, reliability, and operational efficiency; from intelligent monitoring and automation to data-driven infrastructure optimisation.

Enterprise Partner: IONOS

One of our key strategic focuses for 2026 is our growing collaboration with IONOS, built around shared values of reliability, performance, and innovation.

Together, we are consistently developing new ways to:

- Deliver enterprise-grade cloud infrastructure
- Support mission-critical workloads
- Enable scalable, resilient systems for high-growth organisations

Through this partnership, Clamtech continues to strengthen its ability to design, deploy, and manage cloud environments that combine performance, reliability, and security, always aligned with real business needs.

INVESTING

IN OUR PEOPLE: CONTINUOUS LEARNING AT CLAMTECH

> “At Clamtech, continuous learning is a core part of how we work.”

As technology evolves, we invest consistently in training, certifications, and hands-on development to ensure our teams stay ahead. From cloud platforms and DevOps practices to security and infrastructure, our engineers regularly upskill through structured courses and real-world projects.

Beyond technical training, we actively encourage knowledge sharing, collaboration, and professional growth across all departments. This creates an environment where people feel supported, challenged, and motivated to develop.

For us, learning is not just about skills, it is about building confident teams, delivering better solutions for clients, and making Clamtech a place where people genuinely enjoy growing their careers.

Client Says

IONOS

We have partnered with Clamtech for over six years, during which time they have provided exceptional service to many of our clients. From seamless cloud migrations to ongoing system management, Clamtech consistently delivers strategic improvements that enhance efficiency.

Their deep understanding of our cloud infrastructure has enabled them to modernize numerous client environments - transitioning from legacy hardware to fully cloud-enabled systems - resulting in substantial cost savings and improved performance.

Sab Knight
Head of International Markets
