ClamTech

A NOTE

from Malcolm Lungaro-Mifsud, COO

Hello from the new Clamtech HQ

This month marks a turning point for our team - a fresh space, a fresh website, and a renewed drive to help businesses scale smarter and safer.

We have always believed in tech that works for people, not the other way around. Whether you are already part of our journey or just getting to know us, I hope this newsletter gives you a feel for who we are and what we are building together.

Enjoy the Read

WELCOME
to Our New Office

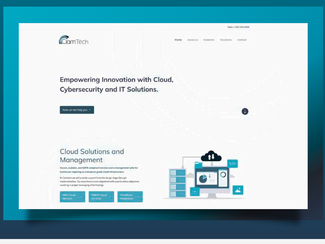

Our new headquarters gives us room to grow, collaborate, and serve customers better. If you haven't seen it yet, check out our channels and drop by for a coffee if you're in the Swatar.

WE'VE OFFICIALLY MOVED!

MEET
the New Clamtech.com

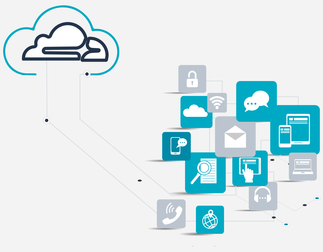

We have launched a bold new website that tells the full Clamtech story. From services to case studies to team intros, it is all here. Have a look: www.clamtech.com

CLAMTECH.COM

Enterprise Partner:
Cloudflare

Clamtech is proud to be an official Cloudflare Enterprise Partner. This partnership gives our clients access to world-class security and performance solutions, including protection from DDoS attacks, advanced traffic management, and global content delivery. Together with Cloudflare, we make sure your business systems stay secure, resilient, and ready to perform - no matter the challenge.

why Upscale Your IT with Clamtech

Business owners today face growing complexity in managing systems, security, and data. We make things simpler - and smarter. Clamtech helps you:

- Scale confidently with any cloud hosting provider
- Protect your business with secure, layered solutions
- Get personalised support from a real human, not a chatbot
- Migrate your cloud infrastructure seemlessly from one provider to another
- Streamline operations through automation
- Migrate your on-premises machines to a cloud infrastructure of your choice

What Our Clients Say

At Clamtech, we believe the strongest measure of our success is the trust of our clients. Here's how our solutions are helping businesses work smarter, safer, and more efficiently.

I've been working with Clamtech since 2012 across a wide range of projects, including major engagements with Betsson, Cerberus, GiG, and most recently Elantil, as well as several independent initiatives. Over the years, we've tackled everything from WordPress blog ecosystems and large-scale ad servers to complex modern GitOps engineering and fully managed corporate IT environments.

Clamtech has consistently been my go-to partner for all infrastructure-related needs. They provide the technical depth and operational muscle required to lift and support our most complex projects. Their reliability, versatility, and deep expertise make them an invaluable extension of our team.
